EDUCATION

Noida Institute of Engineering and Technology - Noida, India CGPA: 8.27
B.Tech in Computer Science Engineering with AI 2026

EXPERIENCE

Ethara AI Jan 2026 - Present
AI Quality Lead

Tech Stack: Prompt Engineering, RLHF, RLVE, SFT, LLM Evaluation, Generative AI, Python

- Led a team of **40+** **interns** in evaluating **LLM and multimodal AI outputs**, ensuring high-quality, policy-compliant responses and improving overall model reliability.
- Executed large-scale evaluations across **Evals** and **Generalist** projects, analyzing text and image-generation outputs to enhance model performance and alignment.
- Assessed **AI-generated images** and produced detailed justifications, maintaining accuracy, safety, relevance, and compliance with project guidelines.
- Designed and optimized prompts for **generative AI image models**, improving output quality, prompt effectiveness, and user satisfaction.
- Supported **RLHF, RLVE, and SFT** training pipelines through preference ranking, response evaluation, feedback annotation, and human-in-the-loop quality assessment.

Internshala June 2023-July 2023
Web Development Intern

Tech Stack: HTML, CSS, JavaScript, Bootstrap, React.js

- Developed responsive web applications using **HTML, CSS, JavaScript, Bootstrap, and React.js**, improving user experience and application performance.
- Implemented **mobile-first** and cross-browser compatible interfaces following modern UI/UX design principles.
- Utilized **React.js components** and debugging techniques to build scalable and maintainable frontend solutions.

PROJECTS

AI Medical Chatbot (RAG) GitHub
Developed a Medical Q&A Chatbot using LangChain, FAISS, HuggingFace, and Streamlit.

- Implemented **LangChain, FAISS, and HuggingFace (all-MiniLM-L6-v2)** to retrieve relevant context from medical documents and improve response accuracy.
- Integrated **Mistral-7B-Instruct LLM** with a **Streamlit** interface, enabling accurate and context-aware answers with source-backed responses.
- Developed an end-to-end **RAG pipeline** including PDF ingestion, text chunking, embedding generation, and semantic search for efficient information retrieval.
- Optimized document retrieval using **FAISS Vector Store**, improving response relevance and reducing hallucinations in generated outputs.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS
Developer Tools: Git, GitHub, VS Code, Google Colab, Jupyter Notebook, Eclipse, IntelliJ IDEA
Frameworks: LangChain, Streamlit, React.js, Bootstrap, FAISS, HuggingFace Transformer
Core Subjects: DSA, OOP, DBMS, Operating Systems, Computer Networks

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundation Associate Certificate Link
- Salesforce Certified Agent Force Specialist Certificate Link
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional Certificate Link

ACHIEVEMENTS

- **GeeksforGeeks Hackathon Finalist** Built a web solution for diabetic patient assistance.
- **Escape Room Winner** Won a cash prize for solving logical challenges.
